email : olivier.jourdan@saphir.fr

Description

Use capacity indicator to provide information about the level or amount of something that has well defined minimum and maximum values. For example, you might use a capacity indicator to show the current level of storage-space usage on a server or the charge left in a battery.

Features

- * Usefull interface to set properties (colors and threshold)
- * All settings are modifiable by property
- * Refresh value of capacity indicator with percent of disk used by method

Instructions

Just unzip the code into any folder of your chosing and select the file "CapacityIndicator.xctl" as a control.

This code has been tested to run under LabVIEW 8.2.1

Dependancies

None

Support
